

System Data

The data listed below provide us with fast and direct access to your system data, the servicing history and the spare parts for the 24/7 service line. With the aid of this data we can help you faster, and can reduce the need for time-consuming queries in respect of technical details.

These basic data are, where necessary, requested by the duty technician at the beginning of calls for assistance. We therefore recommend that you hang this data sheet close to your systems, so that you always have the data at hand when they are required.

System name: _____
